

Index Documentation: converse_lm_consumption_summary_reports_prod

1. User Information

Field Name	Type	Meaning	Possible Values / Notes
uid	integer	User ID	N/A
first_name	keyword	User first name	N/A
last_name	keyword	User last name	N/A
email_addr	keyword	User email address	N/A
mobile_number	keyword	User mobile number	N/A
user_role	keyword	Role of the user	admin / learner / manager
user_status	integer	Status of the user	5 = active, 4 = deleted, 1 = invited
is_admin	keyword	Indicates if user is admin	yes / no
designation	keyword	Job designation	N/A
language_name	keyword	Preferred language	N/A
dob	keyword	Date of birth	N/A
hired_on	keyword	Date the user was hired	N/A

Field Name	Type	Meaning	Possible Values / Notes
user_created_on	keyword	User account creation date	N/A
manager_email_addr	keyword	Email of the user's manager	N/A

2. Module / Course Information

Field Name	Type	Meaning	Possible Values / Notes
mid	integer	Module ID	N/A
cmid	integer	Course or module ID	N/A
module_name	keyword	Module name	N/A
module_type_name	keyword	Type of module	N/A
module_status	integer	Module status	0 = published, 1 = deleted, 2 = draft
module_points	integer	Points assigned for module completion	N/A
module_created_by	keyword	User who created the module	N/A
module_created_on	keyword	Date module was created	N/A
module_updated_on	keyword	Date module last updated	N/A
module_desc	keyword	Module description	N/A
module_imp_name	keyword	Module implementation name	N/A
pre_req_module	key	Prerequisite module name	N/A

Field Name	Type	Meaning	Possible Values / Notes
e_name	word		
prod_master_name	keyword	Master product name	N/A
product_name	keyword	Product name	N/A
skill_name	keyword	Skill associated with the module	N/A
sub_skill_name	keyword	Sub-skill associated with the module	N/A
tags	keyword	Tags associated with the module	N/A
trainer_email_addr	keyword	Email of the module trainer	N/A
coach_email_addr	keyword	Email of assigned coach	N/A
staff	keyword	Staff assigned to module	N/A
published_date	date	Date module was published	N/A
equivalence_module_name	keyword	Name of equivalent module	N/A
estd_time	integer	Estimated time to complete (minutes)	N/A
ratings	integer	Ratings given to the module	N/A

3. Completion Information

Field Name	Type	Meaning	Possible Values / Notes
assigned_status	integer	Assignment status	0 = assigned, 1 = not assigned

Field Name	Type	Meaning	Possible Values / Notes
complete_percentage	integer	Percentage of module completion	N/A
completed_status	integer	Completion status	0 = not completed, 1 = completed
completed_date	date	Date module was completed	N/A
complete_type	integer	Type of completion	learning / assessment / equivalence
complete_version	keyword	Version of the completed module	N/A
comments	keyword	User comments or feedback	N/A
invited_date	keyword	Date user was invited to module	N/A
invited_time	keyword	Time user was invited to module	N/A

4. Location Information

Field Name	Type	Meaning	Notes
city	keyword	City of the user	N/A
state	keyword	State of the user	N/A
country	keyword	Country of the user	N/A

5. Meta Information

Field Name	Type	Meaning	Notes
created_by	keyword	User who created the record	N/A
created_on	date	Timestamp of record creation	N/A
updated_on	date	Timestamp when record updated	N/A
version	integer	Record version number	N/A
id	integer	Unique record ID	N/A

6. Additional Attributes

Field Name	Type	Meaning
------------	------	---------

Field Name	Type	Meaning
attribute_2 – attribute_42	keyword / text	Custom attributes 2–42 (varies)

7. Status Codes (Integer Fields)

Field Name	Possible Values
assigned_status	0 = assigned, 1 = not assigned
completed_status	0 = not completed, 1 = completed
module_status	0 = published, 1 = deleted, 2 = draft
user_status	5 = active, 4 = deleted, 1 = invited

This structure can be replicated for the other indexes:

- **converse_lm_summary_reports_prod** – similar user/module/completion structure but may have fewer custom attributes.
- **learnbee_module_reports_user_summary_prod** – similar structure but focused on per-user module consumption.
